DETAILED ACTION

1. Amended claim 44, 53 (3/27/2006), original claims 45-50, 54-59, and new claims 63-67 are under consideration by the Examiner.
2. Receipt of applicant's arguments and amendments filed on 3/27/2006 is acknowledged.
3. The following previous objections and rejections are withdrawn in light of applicants amendments filed on 3/27/2006:
 - (i) the objection to the specification;
 - (ii) the rejection of claim 52 under 35 USC 112, first paragraph as failing to comply with the written description requirement;
 - (iii) the rejection of claims 44-59 under 35 USC 112, first paragraph, scope of enablement; and
 - (iv) the rejection of claims 44-59 under 35 USC 112, second paragraph.
4. Applicant's arguments filed on 3/27/2006 have been fully considered and were persuasive in part. The issues remaining and new issue are restated below.
5. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim rejections-35 USC § 112, second paragraph

6. Claim 64 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 64, line 1, is improper because it recites "wherein said condition in excess lymphomagenesis" rather than the proper "wherein said condition is excess lymphomagenesis".

Claim rejections-Double Patenting

Non-statutory double patenting rejection (obviousness-type)

7. Claims 53-59 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-11 of U.S. Patent No. 6,645,486 ('486).

This rejection is maintained for reasons of record set forth at pages 8-9 of the previous Office action (1/4/2006).

Applicants argue that the amendment to claim 44 is believed to obviate the double patenting rejection since claims 1-11 of US Patent 6,645,486 are drawn to specific conditions as are current claims 44-50. However, contrary to Applicants arguments, claims 53-59 have not been amended by Applicants. Claims 53-59 are generic to claims 1-11 in the patent and encompass subject matter to which the allowed claims are a species because a method for inducing an elevated titer of an antibody specific for IL-9 by administering a conjugate of IL-9 and a carrier encompasses the claimed method in '486 drawn to a method for reducing activity of IL-9 in specific pathological conditions by administering a conjugate of IL-9 and a carrier. However, the patent claims are obvious from the instant claims because the patent claims are directed to specific embodiments encompassed by instant claims 53-59. The patented method is included in instant method claims 53-59.

The patented method claims if infringed upon would also result in infringement of the broad method claims of the instant application. Allowance of the pending claim, therefore, would have the effect of extending the enforceable life of the allowed claims beyond the statutory limit.

Art Unit: 1646

Conclusion

Claims 44-50, 63, 65-67 are allowable.

Claims 53-59, 64 are rejected.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a).

Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
